

## Sowing the Seeds

*Sowing the Seeds*

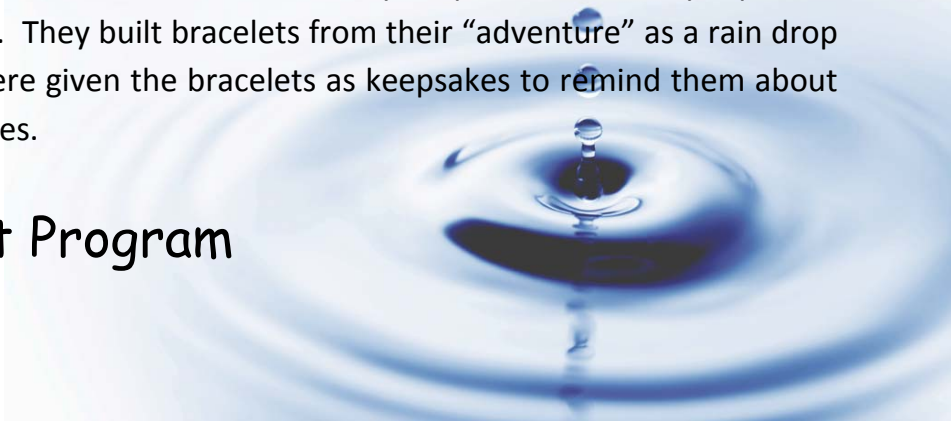

In March 2011 Episcopal Day School and LSU Coastal Roots Program joined together to sow \_\_\_ seeds at The Lacassane Company's Greenhouse. Located in Lake Arthur the Greenhouse not only offered the children an opportunity to restore the historical grounds, but to learn a little architectural history of southern homes.

Brimstone Historical Society

The CPC partnered, once again, with Brimstone Historical Society to bring education and awareness of our fragile ecosystem to the young members of our society. The children, nearly 75 in attendance, enjoyed learning about the life cycle of water. They gained knowledge on what it meant to become a drop of rainwater and how each and every droplet affects every aspect of nature. They built bracelets from their "adventure" as a rain drop and were given the bracelets as keepsakes to remind them about lifecycles.
